ISBN to be assigned by the National Archives of Zimbabwe (NAZ)

For the operator who has been woken at 3 a.m.
by a system that was supposed to know better.

"The best way to predict the future is to build it so that you can see when it is wrong."

CONTENTS

FRONT MATTER

About this book

Who this book is for

How to read it

What this book is not

A note on the specimen

PART I — EVIDENCE: WHAT THE SYSTEM CAN SHOW

1. The morning the desk ran twice
2. Why governability is not the same as control
3. The fact file
4. Reconciliation before trust
5. The evidence the customer can see
6. The daily read

PART II — AUTHORITY: WHAT THE SYSTEM MAY DO

7. The autonomy gradient
8. The authority matrix
9. The human-approval gate is not a compromise
10. Cadence as a design decision
11. The kill switch
12. Case: DeskOS reads thirteen tender sources

PART III — RESOURCES: WHAT THE RUN MAY SPEND

13. The send budget

14. Money, time, and attention

15. The cost-per-run ledger

16. The attention budget is smaller than you think

17. When to pause

18. Pause as a first-class control

PART IV — RECOVERY: WHAT HAPPENS WHEN IT IS WRONG

19. The six failure signatures

20. The incident template

21. The apology is a feature

22. The rollback play

23. The mutation test

24. Your morning ten minutes

AFTERWORD & APPARATUS

The governable enterprise in a world that rewards spectacle

For the operator who has been woken at 3 a.m. by a system that was supposed to know better.

For every customer who received an email from a bot that nobody was watching.

And for the builders who would rather ship a system they can govern than a demo they cannot.

Contents

Part I · Evidence — what the system can show 1. The morning the desk ran twice 2. Why governability is not the same as control 3. The fact file 4. Reconciliation before trust 5. The evidence the customer can see 6. The daily read
